

**OnRush® Schools Software** is an application that has been developed to meet the requirements of school management. It is configured so that it can be customized to handle specific requirements of any school. Separate modules have been designed to take care of Student information, General school information the teaching and non-teaching staff setup, complete module to take care of the library setup and transport of the school. These along with Cash, Bank, Receivables and Payables take care of the financial aspect. Purchases, and Inventory, take care of the procurement cycle thus enabling the user to have complete and accurate details at all times. OnRush® -Schools is a single system where each module integrates with the other.

### Features of the School Application

- Easy to install and use
- Fully Integrated Application
- Robust security
- Multiple Document Interface
- Graphical User Interface

- User definable setup
- Online help and user-friendly tool tips
- High-speed search and retrieval
- Supports student and teacher image in database
- Customized to meet requirements of any school.

### The modules available in this application are

- Setup
- Administration
- Library
- Finance
- Personnel & Payroll
- Inventory & Purchase

## Features

- Details of item, alternate item, unit of measurement, minimum and maximum order quantity and safety stock calculations
- Provision to handle returns and rejected items
- Control stocks by defining the minimum and reorder levels
- Calculate the quantity requested and issued

## Queries and Reports

- Item summary
- Stock Ledger

## Integrates with

- Finance

## System Requirements

This application has been developed using Oracle 9i and Developer 6/6i Client / Server Technology and also available in web enabled technology under Windows XP/2000.

## Hardware

- IBM Compatible Pentium for Server & Client
- Minimum (RAM) 64MB for Server & 32MB for Client
- Recommended 128MB for Server & 64MB for Client
- 

## Software

- Windows XP/2000 & Oracle 9i
- Oracle Application Server v 4.0 (for Web Enabled Technology)
- Windows XP/2000 for Client
- Developer 6/6i Runtime (for Client Server)
- Microsoft Internet Explorer v 4.0 or above (for Web)
